

All ASI products are designed and manufactured to high quality standards to ensure many years of satisfactory service. To assure long life and beauty, products should be cleaned, protected, and maintained as described below. Maintenance methods varying from the below may forfeit any user/owner claims to warranty.

Unbonded Fabric Tac®

Dust, lint, and loose dirt can be removed with the use of a soft brush or by vacuuming. For common stains such as coffee, tea, milk, etc., sponge with water and a common household detergent.

For stains such as grease or wax crayon, spot clean with a household upholstery cleaner.

Bonded Fabric Tac® (adhered to a substrate such as natural cork, plywood, gypsum, drywall, etc.)

For bonded material it is recommended that before utilizing the above procedures, test on a small area first. If no adverse reaction occurs to the adhesive, proceed cautiously using the least amount of water possible to avoid delamination.
