

All ASI products are designed and manufactured to high quality standards to ensure many years of satisfactory service. To assure long life and beauty, products should be cleaned, protected, and maintained as described below. Maintenance methods varying from the below may forfeit any user/owner claims to warranty.

Regular dusting or, if necessary, wiping with a damp cloth guarantees a long useful tackboard life.

Please note: Forbo® tackboard material does not normally need a special maintenance product.

Intensive Maintenance:

Clean tackboard with lukewarm water using a neutral cleansing agent (no greater than pH 8). Simply rinse with clean water after cleaning.
