

MATERIALS:

SHELF: to consist of four 3/4" (19mm) OD round, .050" (1.27mm) wall thickness, clear etched and anodized aluminum tubes, closed and protected with form fitting black plastic end caps.

BRACKETS: two-piece heavy duty die cast aluminum designed with an integral backplate that provides a positive grip fastening and a striated cap to prevent shelf tubes from turning.

DOVETAIL: mounting shall be heavy duty dovetailed aluminum channel with a length of 8" (203mm) providing a vertical slide fitting adjustment of 1 1/2" (38mm). Spacing as per manufacturer's standard but not to exceed 40" (1016mm).

FINISH: for shelf, tubes, and dovetails is clear etched and anodized in a finish to match MM12C22A21 of the Aluminum Association standards. Brackets shall match aluminum finish.
