

MATERIALS:

SHELF: to consist of four 3/4" (19mm) OD round, .050" (1.27mm) wall thickness, clear etched and anodized aluminum tubes, closed and protected with form fitting black plastic end caps.

BRACKETS: two-piece heavy duty die cast aluminum provides a positive grip fastening and a striated cap to prevent shelf tubes from turning.

FINISH: for shelf, tubes, and dovetails is clear etched and anodized in a finish to match AAM12C22A21 of the Aluminum Association standards. Brackets shall match aluminum finish.

CHROME TUBE: shall be bright finished, chromium plated steel tubing 1" (25mm) OD x .049" (12mm) wall thickness, in length to match rack.
