

MATERIALS:

SHELF: to consist of one 3/4" (19mm) OD square 18 gauge steel tube closed and protected with form fitting black plastic end caps.

BRACKETS: one-piece heavy duty impact resistant plastic designed with an integral backplate that provides a positive grip fastening. Color shall be black to match end caps.

DOVETAIL: mounting shall be heavy duty steel, engineered for a slide fitting vertical adjustment of 2 1/4" (57mm) and a length of 5" (127mm). Spacing as per manufacturer's standard but not to exceed 40" (1016mm).

FINISH: for shelf tube and dovetail is a high performance electrostatically applied powder coating, baked on to provide a uniform, smooth protective finish. Color as selected by architect from manufacturer's color range - STL Black or STL Gray.

COAT HOOKS: manufacturer's standard double prong molded ABS high-impact plastic formed to be non-turning, positive gripping and adjustable. Architect to select from manufacturer's standard color range - black, red, or yellow. Hooks to be arranged on 2nd and 4th tubes with spacing to be 6" (152mm) on center.
